Results Proof of the Main Theorem

There Is No Largest Prime Number

The proof uses reductio ad absurdum.

◆□▶ ◆□▶ ▲□▶ ▲□▶ ■ ののの

Theorem There is no largest prime number.

Proof.

- 1. Suppose p were the largest prime number.
- 2. Let *q* be the product of the first *p* numbers.
- 3. Then q + 1 is not divisible by any of them.
- 4. Thus q + 1 is also prime and greater than p.
