Abstract

Make the first line of all sections etc., be indented by the usual paragraph indentation. This should work with all the standard document classes.

\if@afterindent   LATEX uses the switch `\if@afterindent` to decide whether to indent after a section heading. We just need to make sure that this is always true.

```
1 ⟨*package⟩
2 \let\@afterindentfalse\@afterindenttrue
3 \@afterindenttrue
4 ⟨/package⟩
```
